

Charles Ragone

Bethlehem, NY | <https://github.com/cragone>

Professional Summary

Full Stack Developer with a foundation in public health who transitioned into software engineering through automation and self-taught programming. Began with R and Python at Regeneron, automating workflows and reporting systems. Since 2024, professionally developing full-stack systems using Golang, React, and PostgreSQL. Experienced deploying containerized production systems using Docker, k3s Kubernetes, Traefik Ingress, and Azure VMs. Designed and implemented an eligibility snapshot system at UUP. Skilled in Lean release practices, infrastructure-as-code, and end-to-end system ownership from database migrations to frontend delivery.

Technical Skills

- Golang (Gin, GORM, raw SQL)
- Python
- React.js, JavaScript, Tailwind CSS, DaisyUI
- PostgreSQL, MySQL
- Docker & Containerization
- Kubernetes (k3s)
- Traefik Ingress
- AWS & Azure Deployment
- Infrastructure as Code (IaC)
- CI/CD (GitHub Actions)
- Agile Practices

Professional Experience

Full Stack Developer — UUP | Latham, NY | Aug 2024 – Present

- Architected and maintained full-stack applications using Golang and PostgreSQL on Azure.
- Developed responsive frontends with React.js and Tailwind CSS.
- Designed and implemented an eligibility snapshot system.
- Deployed services using Docker and k3s Kubernetes with Traefik Ingress.
- Built secure API authentication and authorization systems.
- Engineered SFTP ingestion pipelines with validation and bulk insertion.
- Developed cron services for time-sensitive data syncing with structured logging.
- Led Agile ceremonies including sprint planning, standups, and retrospectives.

Data Specialist — Regeneron | Rensselaer, NY | Dec 2020 – Aug 2024

- Automated template-based reporting systems using Golang, Python-docx, MySQL, and React.
- Conducted statistical analysis using JMP and Excel to support decision-making.
- Ensured HIPAA, FDA, and OSHA compliance in reporting workflows.
- Built document storage system using Golang, React, PostgreSQL, Okta, and AWS S3.

Full Stack Web Developer — Personal Projects | Niskayuna, NY | Dec 2019 – Present

- Built Division I cross-country fantasy app using Python scraping, Golang backend, and PostgreSQL.
- Developed frontend projects including charlesragone.com.
- Implemented Google and Okta authentication systems.
- Deployed applications using Docker and AWS App Runner.

- Managed Kubernetes clusters hosting multiple services.
- Built Golang CLI tool for database migrations and deployment automation.
- Implemented Go worker pool processing Azure OCR jobs asynchronously.
- Built and deployed production websites with Cloudflare TLS.

Education

Masters Certificate, Fundamentals and Principles of Public Health — SUNY at Albany | May 2024

Bachelor of Science, Human Biology — SUNY at Albany | May 2020
